Table PPS-A

COVID-19 vaccination status and intent to get a COVID-19 vaccine, Household Pulse Survey: January 2021 and September 2021 (Percent)

Characteristic	January 2021	September 2021
Received a COVID-19 vaccine ^a (January, $n = 80,567$; September, $n = 63,536$)		
Yes	13	82
Intent to get a COVID-19 vaccine among those who have not (January, $n = 65,539$; September, $n = 7,001$)		
Definitely yes	54	8
Probably yes	23	10
Unsure	na	20
Probably no	12	18
Definitely no	10	38

na = not applicable; response option not on the survey.

n = number of survey responses.

Note(s):

See Table SPPS-13 for standard errors. Survey population includes those aged 18 years or older. The self-reported vaccination data in this table differ from Centers for Disease Control and Prevention (CDC) data. According to CDC, the percentage of U.S. adults aged 18 years or older who had received at least one dose of a COVID-19 vaccine was 76% as of 12 September 2021 (https://data.cdc.gov/Vaccinations/COVID-19-Vaccinations-in-the-United-States-Jurisdi/unsk-b7fc/data). Responses are to the following:

- Have you received a COVID-19 vaccine? (January data collection)
- Have you received at least one dose of a COVID-19 vaccine? (September data collection)
- Once a vaccine to prevent COVID-19 is available to you, would you...

Definitely get a vaccine.

Probably get a vaccine.

Be unsure about getting a vaccine (response option unavailable in January data collection).

Probably NOT get a vaccine.

Definitely NOT get a vaccine.

U.S. Census Bureau, Household Pulse Survey, Phase 3, Week 23 (20 January-1 February 2021), and Phase 3.2, Week 37 (1-12 September 2021).

Science and Engineering Indicators

^a "Yes" indicates survey respondents who reported receiving at least one dose.

^b Percentages may not add to 100% because nonresponse category is not shown. "Unsure" response option was unavailable in January data collection.
